**INFORMATION ABOUT Assembly Bill (AB) 1650, Portantino. Public Utilities: Emergency and Disaster Preparedness:**

**AB1650**, became law on January 1, 2013. **AB1650** does the following:

- Requires the CPUC to establish standards for disaster and emergency preparedness plans within an existing proceeding, including, but not limited to, use of weather reports to preposition manpower and equipment before anticipated severe weather, methods of improving communications between governmental agencies and the public, and methods of working to control and mitigate an emergency or disaster and its after effects.
- The bill requires electrical corporations to develop, adopt, and update an emergency and disaster preparedness plan in compliance with the standards established by the CPUC.
- The bill authorizes those agencies to designate a point of contact for the electrical corporation to consult with on emergency and disaster preparedness plans and requires the electrical corporation to provide the point of contact with an opportunity to comment on draft emergency and disaster preparedness plans.
- An emergency and disaster preparedness plan must address recent emergencies and disasters associated with the electrical corporation or similarly situated corporations, and address remedial actions for possible emergencies or disasters that may involve that corporation's provision of service.
- Every two years, in order to update and improve that electrical corporation's emergency and disaster preparedness plan, the electrical corporation must invite appropriate representatives of every city, county, or city and county within that electrical corporation's service area to meet with, and provide consultation to, the electrical corporation.
