January 29, 2010 Version 1.1

- 4 Check the appropriate category box for each measure. Lighting examples include: interior and exterior lighting retrofits including linear fluorescents, HID, induction, cold cathode and compact fluorescents (not including screw-in lamps).
- 5 Check the appropriate category box for each measure. ACR I (Air Conditioning & Refrigeration) examples include: high-efficiency chillers, package air conditioners (>760,000 Btu/hr or > 63.3 tons), Variable Speed Drive installation on existing a/c or refrigeration compressor motors, constant air volume to variable air volume conversions and A/C compressor replacements.
- 6 Check the appropriate category box for each measure. ACR II (Air Conditioning & Refrigeration) examples include: controls & energy management systems for HVAC or refrigeration equipment, fan, pump and/or motor replacements, cooling tower upgrades and refrigerated case doors.
- 7 Check the appropriate category box for each measure. Examples of other measures include: motor upgrades (all sizes), industrial fan replacements, industrial pump replacements, exhaust hood and fan projects and CO sensors for parking garages.
- Check the appropriate category box for each measure. Gas examples include: thermal oxidizers, boiler or furnace replacements and boiler heat recovery.
- The utility engineer will verify calculations and projected savings.
- The numbered lines in the first box correspond with the numbered lines in the second and third boxes.

Here for you, every day.^{⁵™}
