INFORMATION ABOUT THIS REQUEST

The CPUC initiated this rulemaking in June 2012 to examine current residential electric rate design and structure.

Assembly Bill (AB) 327 was signed into law in October 2013 permitting electric rate reform in California.

On February 28, 2014, SDG&E filed a request with the CPUC for changes to residential rates starting in 2015 and a roadmap for rates through 2018. SDG&E's request will better align rates with the actual costs of providing electric service as indicated by AB 327. As a result, some customers will see increases in their monthly bill and others will see decreases. This proposal will not change the amount of total revenues collected by SDG&E, which is determined in other proceedings.

Specifically, SDG&E is proposing to:

- Transition from its current 4-tiered structure to a 2-tiered structure beginning in 2015, and then gradually bring the rates for the 2-tiers closer together;
- Offer optional non-tiered time-of-use (TOU) offerings beginning in 2015;
- Transition limited TOU rates that could result in default TOU rates by 2018;
- Charge a monthly service fee;
- Gradually reduce the California Alternate Rates for Energy (CARE) discount percentage in order to comply with AB 327's mandate that the CARE discount should be between 30% and 35%;
- Transition non-CARE medical baseline customers so they will pay equivalent non-CARE rates by 2018, while they continue to receive additional baseline.
